Profile

Results-driven and detail-oriented professional seeking to leverage strong analytical, problem-solving, and communication skills in a growth-oriented role. Adept at teamwork, project management, and delivering innovative solutions aligned with organizational goals .

Projects :

[NIEC-WRITES](#)

React • Redux • Appwrite • VS-code

Developed and deployed a responsive React-based web application (NIEC Writes) enabling students to publish and share creative and technical content in an organized manner.

[NEVEROLD](#)

React • Supabase • Tailwind CSS

Developed a *campus marketplace web application* using *React, Supabase, and TailwindCSS*, enabling students to buy and sell pre-owned items within their college community. Implemented **cart system**, **user authentication**, and **verification badge feature** to enhance usability, trust, and user experience. Designed a **responsive UI** with dynamic product listings and seamless **database integration** for real-time updates.

[IOT SENSOR MONITORING PORTAL](#)

Javascript • ExpressJS • MongoDB • EJS

ISM Portal (IoT Sensor Monitoring) is a real-time web dashboard for visualizing data from multiple IoT sensors installed in home/workplace and sensor data can be accessed from anywhere anytime.
